SUMMARY

Computer Science undergraduate with strong analytical and first-principles problem-solving skills, blending machine learning, data-driven modelling, and full-stack development. Proficient in Python, SQL, and cloud technologies, with hands-on experience building end-to-end ML and web systems in Agile environments. Quick to learn new domains, translate data into actionable insights, and collaborate across cross-functional teams.

EDUCATION

B.Tech – CSE (Cloud Computing), SRM Institute of Technology Jun 2023 – May 2027

CGPA: 8.4 / 10 (Till 6th semester)

Higher Secondary Education (Class XII), St. Joseph Mat. Hr. Sec. School, Chennai Jun 2022 – Apr 2023

Subjects: PCM + Computer Science | Percentage: 70%

PROFESSIONAL EXPERIENCE

Web Developer Intern – Zidio Development Jun 2025 – Jul 2025

- Developed responsive web applications using React.js, JavaScript, Node.js, and Express.js within an Agile development workflow.
- Built modular and maintainable frontend and backend components, improving code organization and application scalability.
- Integrated third-party APIs and backend services to extend application functionality and improve user workflows.

Marketing Executive – El RevGen Healthcare Solutions Pvt. Ltd. Feb 2024 – Jan 2025

- Supported digital marketing and client engagement activities for healthcare services, outreach, and lead management.
- Executed marketing campaigns, data tracking, and performance reporting to enable data-driven decisions.
- Coordinated with cross-functional teams to ensure accurate documentation, compliance, and timely execution.

PROJECTS

Heart Disease Classification Feb 2025 – Apr 2025

- Developed a Heart Failure Prediction System using machine learning models to analyze patient health data and predict the risk of heart failure with high accuracy.
- Pre-processed clinical data and applied feature selection to enhance model accuracy.

Tech Stack: Python, Machine Learning, Data Preprocessing, Model Evaluation

DisasterAI – Machine Learning-Based Disaster Detection System (API) Jan 2026 – Apr 2026

- Developed a full-stack disaster detection and early warning system using machine learning techniques to classify disaster scenarios (SAFE/DAMAGE) from image and video inputs.
- Built an end-to-end pipeline including data preprocessing (resizing, normalization), feature extraction, and model training for real-time prediction.

Tech Stack: Python, Machine Learning, FastAPI, React.js / Flutter, OpenCV, NumPy, Scikit-learn

Movie Ticket Booking System (MERN Stack) Jul 2025 – Nov 2025

- Created a full-stack movie ticket booking system based on the MERN stack, allowing users to explore movies, pick show timings, and book seats via an interactive React.js interface.
- Implemented a scalable Node.js/Express backend with MongoDB and JWT authentication, and thoroughly tested APIs using Postman, handling 100+ concurrent user requests seamlessly.

Tech Stack: MERN (React.js, Node.js, Express.js, MongoDB), JWT

YAACATCHY – Full-Stack E-Commerce Platform (Freelance Project) Jun 2026 – Jul 2026

- Developed a full-stack e-commerce platform for a real-world client, implementing customer authentication, product browsing, shopping cart, checkout, order management, and admin functionalities.
- Integrated frontend, backend services, database operations, payment workflows, and third-party APIs to support a complete customer-to-order workflow.

Tech Stack: React.js, TypeScript, Tailwind CSS, Supabase, REST APIs, Razorpay, Git

SKILLS

Programming & Data: C++, Python, C, SQL, Data Structures & Algorithms, Object-Oriented Programming

Data Science & Analytics: Machine Learning, Data Preprocessing, Model Evaluation, Statistical Analysis

Data & Databases: MySQL, MongoDB, DBMS, REST APIs, Postman

Cloud & Engineering: AWS, Cloud Deployment, Git, GitHub Actions, CI/CD, Agile

AI/ML: Machine Learning, NLP, RAG, AI Agents, LangChain, Model Context Protocol (MCP)

Software Development: Node.js, Express.js, Microservices, JWT Authentication

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Core CS: Operating Systems, Computer Networks

ACHIEVEMENTS

- Completed Oracle Cloud Infrastructure 2025 Data Science Professional (1Z0-1110-25) certification.
- Actively practicing competitive programming with a LeetCode rating of 1460, strengthening DSA skills.
- Participated in multiple technical hackathons and coding events, enhancing real-world problem-solving abilities.
- Built and deployed 3+ full-stack and ML-based systems.

PUBLICATIONS

“DisasterAI: Real-Time Disaster Detection and Risk Assessment using Machine Learning.” Submitted to the International Conference on Natural Language Processing and Computer Vision (ICNPCV 2026). **Status: Under Review.**

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Data Science Professional (1Z0-1110-25)
- Deloitte Australia – Cyber Job Simulation
- Tata Group – GenAI Powered Data Analytics Job Simulation

EXTRA-CURRICULAR

Design Lead | ANDROPEDIA, SRM-IST

May 2023 – May 2025

- Headed the design team, creating branding and promotional materials for campus events.
- Collaborated with event organizers to deliver visually consistent and engaging creatives.
